Professional Summary

Experienced full-stack software developer building web, mobile and cloud applications for clients worldwide. Builds responsive frontends with React and Next.js, cross-platform mobile apps with React Native, and backends and APIs with Node.js, Python and PHP. Ships with Docker, GitHub Actions and Vercel, and adds AI features such as chatbots and LLM integrations with the Claude and OpenAI APIs. Holds the IBM Full Stack Software Developer Professional Certificate and focuses on clean, maintainable code.

Core Expertise

- **Frontend:** React, Next.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, Framer Motion, responsive design, Figma, SEO and web performance, accessibility
- **Mobile:** React Native, cross-platform iOS and Android apps, push notifications, App Store and Google Play publishing
- **Backend:** Node.js, Express, Python (Flask, Django), PHP, REST APIs, microservices, serverless functions, Stripe payments
- **Databases:** SQL, MySQL, MongoDB, object-relational mapping (Django ORM)
- **Cloud and DevOps:** Docker, Kubernetes, Red Hat OpenShift, Istio, IBM Cloud, CI/CD, GitHub Actions, Vercel, Render, Firebase, GitHub Pages
- **AI and data:** LLM integration (Claude and OpenAI APIs), prompt engineering, AI chatbots, generative AI, IBM Watson, Python for data science (Pandas, NumPy)
- **Testing and practice:** unit testing, React Testing Library, Agile and Scrum, Git and GitHub, Vite, software development life cycle
- **Other:** Java, UI/UX design, data visualisation
- **Soft skills:** problem solving, fast learning, attention to detail, teamwork, client communication

Experience

Freelance Full-Stack Developer (Web, Mobile and Cloud), Self-employed (Upwork, Fiverr, direct clients) | 2024 to Present

- Built and launched the corporate website for United Group for Financial Consultations (unitedgroupeg.com) with React, Tailwind, PHP and MySQL.
- Handled projects end to end, from UI/UX design and React or React Native frontends to Node.js, Python and PHP backends, databases and cloud deployment.

Selected Projects

- **United Group** (client): corporate website for a financial consulting firm. React, Tailwind, PHP, MySQL.
- **Essence**: responsive e-commerce storefront. React, Tailwind, PHP, MySQL.
- **Pulsar**: SaaS dashboard with interactive data visualisation. React, Tailwind.
- **Nestly**: real estate platform UI. React, Tailwind.
- **Saffron**: restaurant site with menu and reservations. React, Tailwind.
- **Alex Rivera**: animated personal portfolio template for a software engineer. React, Tailwind, Framer Motion.

Education and Certifications

- **Computer Science and Engineering**, German University in Cairo (GUC)
- **IBM Full Stack Software Developer Professional Certificate**, IBM via Coursera. Covered React, Node.js and Express, Python with Flask and Django, Docker, Kubernetes and OpenShift, microservices and serverless, and a full-stack capstone project.
